

Accessing DCO Connect Rooms on Mac

Overview:

Mac OS X and Mac browsers treat SSL certificates differently than Windows. On Windows, browsers prompt users when an unrecognized/trusted certificate is encountered. However on a Mac a user is not prompted when entering a Connect room and therefore must perform the below steps to import the DoD CA-13 certificate into their Keychain.

Steps to Import DoD CA-13 Certificate into Keychain:

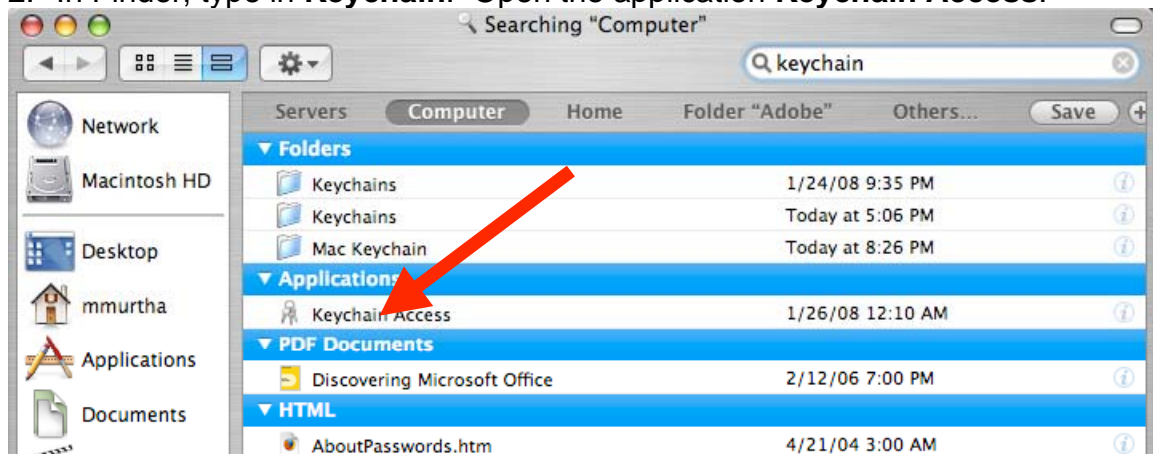

1. Obtain the DoD CA-13 certificate. This certificate should be in the .cer or .crt format. This certificate can also be found at <https://airborne.nrl.navy.mil/PKI/>. Do not left-click on the below link but rather perform a right click and 'Save Link As' to your computer.

[PEM DER CN=DOD CLASS 3 EMAIL CA-8, OU= PKI, OU=DoD, O=U.S. Government,](#)
[PEM DER CN=DOD CLASS 3 EMAIL CA-9, OU=PKI, OU=DoD, O=U.S. Government,](#)
[PEM DER CN=DOD CLASS 3 EMAIL CA-10, OU=PKI, OU=DoD, O=U.S. Government](#)

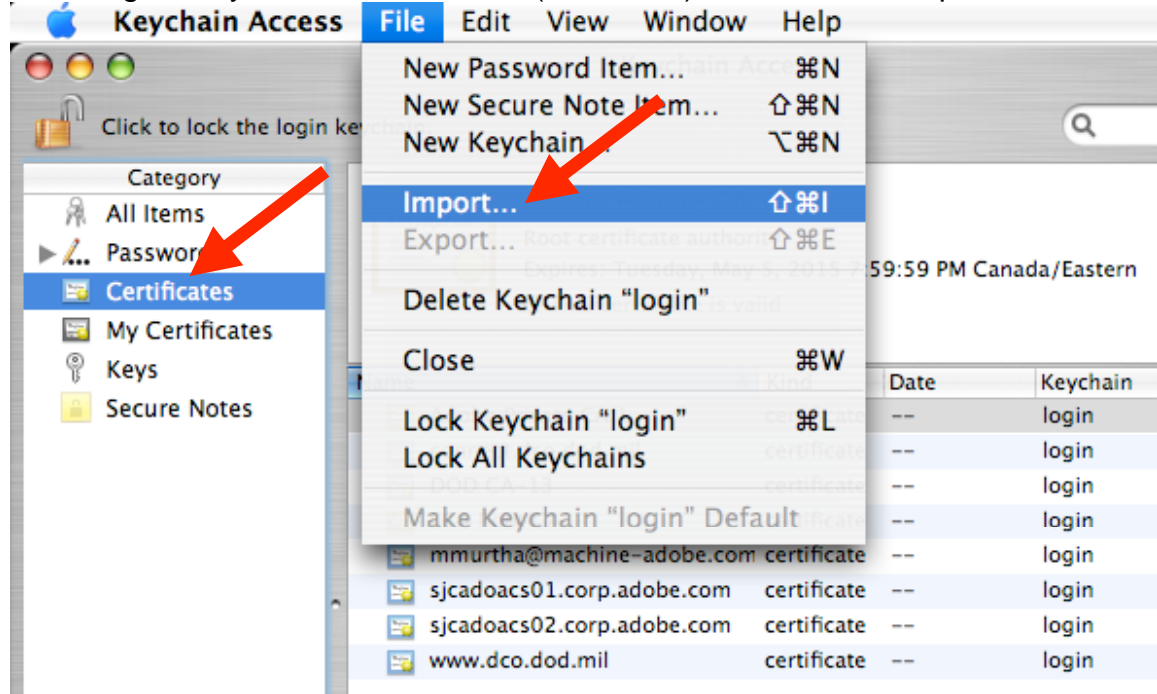

DoD Root CA 2(Not Before: Monday, December 13, 2004 3:00:10 PM GMT, N
GMT)

Root CA 2: [PEM DER CN=DoD Root CA 2, OU=PKI, OU=DoD, O=U.S. Government,](#)
[PEM DER CN=DOD CA-11, OU=PKI, OU=DoD, O=U.S. Government, C=US](#)
[PEM DER CN=DOD CA-12, OU=PKI, OU=DoD, O=U.S. Government, C=US](#)
[PEM DER CN=DOD CA-13, OU=PKI, OU=DoD, O=U.S. Government, C=US](#)
[PEM DER CN=DOD CA-14, OU=PKI, OU=DoD, O=U.S. Government, C=US](#)
[PEM DER CN=DOD CA-15, OU=PKI, OU=DoD, O=U.S. Government, C=US](#)
[PEM DER CN=DOD CA-16, OU=PKI, OU=DoD, O=U.S. Government, C=US](#)

2. In Finder, type in **Keychain**. Open the application **Keychain Access**.

3. In Keychain Access select your Certificates category and then File>Import. Navigate to your DOD_CA-13.crt (or .cer file) and select for import.

4. Your DoD CA-13 certificate should now be visible in your Keychain. You are now ready to enter in to Connect rooms on your Mac!
